Senior Full Stack Software Engineer and AWS Certified AI Practitioner with 7+ years shipping production web applications across fintech, sports, and geospatial SaaS. Frontend specialist in React, Next.js, TypeScript, and JavaScript with solid backend experience in C# / ASP.NET Core, SQL, Node.js, and Python, owning features end-to-end from requirements gathering through deployment. Brings strong client-facing communication and native Spanish / professional English (B2+) to distributed, international teams.

⭐ CAREER HIGHLIGHTS

- Cut invoice load time from 30s to ~300ms (~100× faster) on a B2B fintech platform by optimizing its SQL queries and API endpoints.
- Built and maintained frontends for 4 real-time sports-data platforms with ~400K combined monthly visits.
- Took AI to production: shipped an OpenAI-powered product feature and automated team workflows with Claude.
- Lifts team quality as a mentor, code reviewer, and pair-programming partner who unblocks peers.

💼 PROFESSIONAL EXPERIENCE

Ibylit — Senior Full Stack Engineer *Jan 2024 – Present*

B2B fintech SaaS startup

- Design and build C# / ASP.NET Core REST APIs and SQL Server schemas powering a B2B fintech platform for international financial clients, including in Argentina.
- Drive performance work across the stack — e.g., cut invoice load time from 30s to ~300ms (~100× faster) by optimizing SQL queries and API endpoints.
- Integrated the OpenAI API to ship a new AI-powered product feature.
- Improve reliability with Sentry + Slack alerting, and cut manual team work with Claude-driven workflow automation.
- **Stack:** React, C#, ASP.NET Core, SQL Server, AWS

Advision Development — Mid-Senior Frontend Engineer *Jan 2021 – Oct 2023*

Live sports-data platforms for U.S. sportsbooks

- Built and maintained frontends for 4 real-time platforms (OddsTrader, TheRX, Bookmakers Review, Sportsbook Review) with ~400K combined monthly visits.
- Shipped features and hotfixes within a large org: 7 dev teams plus dedicated QA and design.
- Built Node.js and PHP/WordPress backend endpoints serving live odds, scores, and editorial content to the React frontends.
- **Stack:** React, Node.js, PHP, WordPress, AWS

Data GIS — Full Stack Engineer *Dec 2018 – Jan 2021*

Real-estate geospatial-intelligence SaaS

- Built a geospatial valuation tool for appraisers — interactive maps + automated valuation.
- Integrated with in-house systems and ArcGIS (a core dependency), centralizing valuation data.
- Fed a shared database reused across company projects, making appraisers faster and more accurate.
- **Stack:** React, JavaScript, Python, Flask, MySQL

Tecnológico de Costa Rica — Web Developer (Internship) *Jul 2017 – Aug 2019*

- Led end-to-end development of an internal web system, working with a governing board.
- **Stack:** ASP.NET, SQL, jQuery, Bootstrap

Workana (freelance platform) — Software Developer *Jan 2017 – Dec 2018*

- Delivered desktop applications, mobile apps, and web features for a range of international clients.
- Completed 15 top-rated projects, earning strong client feedback and recommendations.

🎓 EDUCATION

Tecnológico de Costa Rica (TEC) — Bachelor's Degree in Computer Science (Computing Engineering) *2013 – 2019*

One of Central America's leading engineering universities.
